

Introducing Our New Strategic Business Partner!

Smart Sink®

a better solution

The Cactus® Smart Sink® securely captures raw pharmaceutical waste and renders it acutely "unrecoverable" and "unusable", so discarded drugs do not end up in the wrong hands or negatively impact our environment.

In compliance with regulatory guidelines, the Cactus® Smart Sink® provides a better solution to disposing raw pharmaceutical waste in a sink or toilet. It's tamper-proof technology includes automatic alarms and secure locking systems. Alerts will sound when containers are full or reach expiry. It's easy to use and easy to install.

Protects The Environment

*Through The Responsible
Disposal of Pharmaceutical Waste*

Securely Captures Raw Pharmaceutical Waste

Smart Sink®

Securely captures raw pharmaceutical waste and renders it acutely "unrecoverable" and "unusable" so discarded drugs do not end up in the wrong hands or negatively impact our environment.

Captures Raw Pharmaceutical Waste

- The Cactus® Smart Sink® acts like a portable sink with no drain so drug waste will not contaminate our water, soil or landfills.
- The Smart Sink® has separate access ports for liquids and solids (capsules, tablets and patches).
- Liquid port features an "easy-shot" access funnel to eliminate the chance for spills.
- Perfect for pharmacies, hospitals, doctors' offices, nursing homes, veterinary clinics and anywhere drugs are dispensed and administered.
- Conveniently sized to fit in procedure rooms, nursing stations, clinics, pharmacies and near drug dispensing machines.

Renders Waste Acutely Unrecoverable and Unusable

- The Cactus® Smart Sink® helps bring hospital pharmaceutical waste procedures into compliance by simplifying the process.
- Tamper-proof liquid container absorbs discarded syrups, liquids and other pharmaceutical related fluid waste, so it cannot be retrieved.
- Tamper-proof solids container accepts unused capsules, tablets and patches and renders solids "unrecoverable" and "unusable".
- Reduces risk of discarded pharmaceutical waste from ending up in the wrong hands or negatively impacting our environment.

Securely Stores Pharmaceutical Waste

- The Smart Sink® features an automated, tamper-proof, battery-operated alert system equipped with warning lights and audible alerts.
- Securely mounts to a wall or a countertop, locking it into place. Unit is accessed only with security key.
- Alerts occur when: unit is full, container is past expiry, unit is tampered with, or when the battery is low.
- Internal container system features tethered, tamper-proof locking caps that prevent access to discarded pharmaceutical waste.

Assures Proper Disposal Per Regulatory Guidelines

- The Cactus® Smart Sink® containers are clearly marked and identified to ensure proper disposal per regulatory guidelines.
- Safely secures discarded waste in tamper-proof containers until they can be disposed of properly by authorized personnel.

Important: Continue to follow the recommended guidelines for proper pharmaceutical waste disposal required by your facility.

It's Easy To Use and Easy To Install

- Installation is quick and easy! No complicated buttons or instructions required.
- Position anywhere! Mounting bracket locks in place so it can be securely fastened to a wall, mobile cart or countertop.
- Unit is battery powered requiring no electricity.
- Quickly and easily order replacement containers at expworld.com.
