## **Big Red Med Disposal Box is ready to launch**

Rx Disposal is now the successor to the Lloyd Magothy Water Trust, Inc.'s Operation Big Red Med Disposal Box.

Rx Disposal is able to collect and dispose of **controlled** and **non-controlled** medications from ultimate users.

Rx Disposal obtained Special Permit 20479 from the U.S. Department of Transportation. Our DOT SP 20479 enables DEA authorized collectors to use the packaging we supply to ship the collected medications via FedEx or UPS to our designated DEA registered reverse distributor for the purpose of destruction by incineration.

Rx Disposal has the lowest cost in the market place with no subscription for replacement inner liners required. Replacement inner liners are purchased and supplied on an "as needed basis" which further minimizes your costs – you only pay for what you need.

Your distributor/wholesaler (whether it's McKesson, Cardinal Health, AmerisourceBergen, RDC, etc) may be interested in contributing financial support to you for making available such a **worthwhile community service – responsible medication disposal**. In fact, your distributor/wholesaler may go "upstream" to pharmaceutical manufacturers for additional support via direct underwriting or coupon incentivization.

The Big Red Med Disposal Box has an ingenious "**full indicator**" which eliminates the need to unlock and open the inner liner access door to check on its fullness.

Extra inner liners are neatly stored inside the Big Red Med Disposal Box which means that you always have a backup inner liner on hand if the inner liner that's in use suddenly gets full.

I hope that you will consider installing the Big Red Med Disposal Box.

Let's make responsible medication disposal a valued service that your pharmacy provides and your patients appreciate.

I look forward to hearing from you. Contact me with your questions and we can discuss your potential order for medication disposal service via Big Red Med Disposal Box. See attached for pricing.

Sincerely,

Tom McAbee

*The Big Red Med Disposal Box enables people to responsibly dispose of their unwanted medications. Responsible medication disposal prevents contamination of our waters caused by the flushing of medications (an environmental concern), and prevents prescription drug abuse which often leads to heroin use (a societal concern).*
