FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION (DEP)

WORKSHOP ANNOUNCEMENT

In June of 2005 DEP published a guide to assist Florida Automotive Recyclers in understanding environmental regulations that govern the automotive recycling industry. The guide outlines requirements and environmental Best Management Practices (BMPs) for the auto recycler's industry as they apply to shop owners in the state of Florida. The book and the accompanying self-audit checklist were designed to assist your facility in reducing waste, complying with important environmental regulations, and achieving an overall cleaner auto salvage yard.

FDEP is holding 9 workshops across the state of Florida in March and April of 2006 to introduce the workbook to the regulated community. The workshops will be held in central locations in each region of the state. You are cordially invited to attend a workshop in your area to obtain information about complying with state environmental regulations. A copy of the agenda for each workshop is noted in this brochure as well as dates, times and locations of the workshop nearest you. Shop owners, mechanics, equipment operators, and all other facility workers are invited to attend the workshops.

WORKSHOPS ARE FREE !!

AGENDA TOPICS

- BMP's for incoming & processing of vehicles
- Spills and Leaks
- Container Management & Storage
- How do I determine if I am a Generator?
