

BUSINESS RECOVERY

► STRATEGY WORKSHOP

Keeping your doors open after disaster can be harder than you ever imagined. Many Florida businesses continue to recover after two relentless hurricane seasons. Now that we are facing a third season, be prepared. The Florida Department of Community Affairs is sponsoring this free one day workshop to provide business owners and employees an opportunity to learn about the hazards and impacts they face. Through the use of educational briefings and innovative technologies, participants will leave the conference with an outline of a plan that they can use to be prepared for the next time disaster strikes.
